

Excel Power VacTM

It is for those who value only the best

DUCTED VS PORTABLE VACUUMS

As the technology of portable vacuums has evolved, they have in turn become more expensive. As the difference in price between ducted vacuum systems and portable vacuums has lessened, Ducted vacuum systems have become a more practical and cost-effective solution to cleaning your home. There are several benefits to ducted vacuum systems:

Healthier Air - Ducted vacuum systems eliminate the re-circulation of dirty air inside your living area because the dust and debris is carried through the walls to an out-of-the-way receptacle.

Power - Ducted vacuums have three to five times more power than traditional vacuums. Because the power unit is not meant to be portable, it can contain a more powerful motor than traditional vacuums.

Convenience - Ducted vacuums eliminate the need to carry a heavy unit from room to room or up and down the stairs. There are no cords to trip over, and your power brush can be inserted right into the wall inlet locations that you choose, instead of into pre-determined electrical outlets.

Home Value - Investing in any permanent appliance in your home should help increase the value when you decide to sell. Ducted vacuums can be installed in existing homes or in homes that are under construction.

Noise - Generally, ducted vacuum systems are quieter than traditional vacuums. Remember that the power unit is located elsewhere (garage, basement, etc.), so the noise will probably be insulated.

Versatility - Ducted vacuums offer the same range of attachments and accessories that portable vacuums offer.

Cost - Ducted vacuum dealers claim that ducted vacuums save you money by prolonging the life of your carpeting, drapes and furniture through deeper cleaning.

Large Dirt Collection - The large dimensions of the dirt canisters allow the vacuum to pick up a lot of debris before it needs emptied. With all of this space for dirt collection it could be months before your dirt canister needs emptying.

Powerful Vacuum - With 3-5 times more cleaning power than most portable vacuum cleaners, you get a superior cleaning in less time. Since the ducted vacuum power unit is located in a closet, the garage or basement and you aren't having to carry it around while you clean, it can have larger, more powerful motor. The ducted vacuum allows you to pick up more debris with less hassle than a portable.

A clean you can trust - You can always count on EXCEL Power Vac System for everyday cleaning. Year after year!

THE BENEFITS

There are many unique benefits to owning a EXCEL Power Ducted Vacuum System!

Quality products, great service and a trusted name in the industry, and it's all backed by the industry's comprehensive Limited Warranty.

100% of all vacuumed dirt, allergens and odors are removed 100% of the time! Exclusive Filtration Technology provides maximum power, filtration, and consistent cleaning performance every time you vacuum.

Powerful cleaning performance improves indoor air quality, creating a healthier home environment for your family. EXCEL Power Vac eliminates the re-circulation of dirt, dust and odors, which is perfect for families with allergy and asthma sufferers, or pets.

Convenient whole-house cleaning with just one simple system. EXCEL Power Vac has the widest selection of accessories specifically designed to clean all interior surfaces, floorings, carpets, furnishings and window treatments – ideal for garages, campers and boats too! No heavy equipment to lug around, just insert the hose into the closest inlet valve for fast and easy cleaning

With an extensive product line, EXCEL Power Vac can match the right system to any home size, home design or budget.

The lightweight and durable ABS dirt bucket has a comfort-grip bottom for easy handling. Plus with a large dirt bucket capacity, you'll empty it less frequently, and it's clear so you can see when you need to do it.

An EXCEL Power Vac adds resale value to your home, extends the life of carpets and furnishings, saves time and improves your indoor air quality.

THE ADVANTAGES

Vacuuming is part of creating a clean and healthy home for your family. But not all vacuum cleaners are created equal. While all vacuums do remove dirt from carpets and other surfaces, most of the canister and portable systems redistribute finer particles back into the living environment. An Excel Power Vac System, if installed properly, exhausts outside the home. This significantly improves indoor air quality and minimizes the build up of dust.

If you use an Excel Power Vac System, you will clean your home more thoroughly and create a much healthier environment for yourself and your family.

HEALTHY HOME

A clean and healthy home environment for your family is important. Many people take their home's air for granted and assume it is safe, clean and breathable. The problem is, indoor air can be up to 100 times more polluted than outdoor air! Several reasons for this increase include today's more tightly sealed housing construction, synthetic building materials and furnishings, and chemically formulated household products.

Most people spend 90% of their time indoors. Poor indoor air quality can affect health, safety and comfort – especially in children and the elderly. With powerful motors and no recirculation of particles, Use of an Excel Power Ducted Vacuum System can greatly reduce allergy and asthma symptoms. EXCEL Power Vac eliminates 100% of vacuumed dirt, dust & allergens, creating a healthier home with cleaner indoor air.

Nothing to sneeze at. Leave the allergies outside. Indoor air pollution is one of the most common problems for allergy sufferers.

Ducted vacuum systems often are recommended by allergists for removing pollutants from the home.

Research has revealed that using a ducted vacuum system can improve indoor air quality and significantly reduce allergy symptoms.

Here is the comments of some Leading organizations about how ducted vacuum systems improve Indoor Air Quality (IAQ):

"Using ducted vacuum systems that are vented to the outdoors can significantly reduce dust mites, pollens, animal dander and other allergy agents.

"Ducted vacuum systems are among the best indoor air quality investments for your home."

"Allergy sufferers' symptoms can be improved up to 61% when using a ducted vacuum system."

"The healthiest type of vacuum to operate is a ducted vacuum that is vented outdoors."

Design:

The new Excel Power Vac Series 2 is more advanced than any other ducted vacuum unit on the market. It has been developed using the latest CAD technology to bring ducted vacuums into the 21st century. Designed from the ground up with both the user and the installer in mind, no expense was spared to address the limitations of the existing systems.

Professionally styled and finished to an automotive standard, it is a cosmetically pleasing appliance that anyone would be proud to have in their home.

Construction:

Only top quality components are used in the construction of the Excel Power Vac – without compromise.

The best available heavy duty motors are sourced from Europe. A proprietary Printed Circuit Board controls all the functions of the ducted vacuum power unit. Internal sound insulators significantly reduce the level of noise emitted by the unit.

The main body of the ducted vacuum power unit is made of a heavy duty ABS polymer material, which means that you will never have to worry about dents or corrosion. Automotive standard UV stable paint finish is applied to all exterior surfaces to create modern and stylish appearance.

Emphasizing lifestyle and healthy living Excel Power Vac Series is crafted without any compromise.

No need to lift heavy vacuums, trip over cords or drag a portable canister around furniture causing damage. There's only a lightweight hose that gets in all the hard to reach places – even under furniture!

A larger motor allows EXCEL Power Vac Systems to provide much more suction power than a portable vacuum. Balanced motor air intake and exhaust removes excess heat out of the motor

Less hassle - EXCEL Power Vac Systems have a self-cleaning filter and a large capacity dirt bucket that only needs to be emptied about twice a year. Portable vacuums have filters that need to be replaced and bags that need to be emptied regularly.

Excel Power Vac offers a balance of strong suction power and an abundance of airflow which is: Suction power to pull through plush carpet and sufficient airflow to carry dirt away.

Blowback - unlike conventional vacuums that can recirculate dusty air, an EXCEL Power Vac System removes 100% of contacted dirt, dust, mites, pollen, animal dander and other allergens from the home.

Unique design - Excel Power Vac's unique design allows the same power unit to function with a disposable bag or without. Easy lock dustbin attachment makes emptying a breeze. The choice is up to the user.

Safe and easy to use - Just plug a long light weight hose into the wall inlet - no need to carry vacuum cleaner up and down stairs. Safe around children - can only be activated by plugging in the correct hose.

Versatile and convenient - Ideal for carpets and hard flooring alike. Clip-on dust collector is easily emptied. There is a model to suit every home design, size and budget, can be easily fitted to new or existing homes.

Benefits to your home - Covered by a comprehensive warranty. Tough heavy duty ABS polymer material, body of the power unit is totally dent and rust proof. Can be supplied as a ready-to-install kit or fully installed by skilled technicians.

Clean you can trust - You can always count on EXCEL Power Vac for everyday cleaning. Year after year.

Auskey International manufactures EXCEL Ducted Vacuum Systems and PVC pipes and pipe fittings. Auskey International offers a complete solution for any ducted vacuum application and supplies components and finished products to many leading providers.

Tools and Accessories:

- No matter what type of floor covering you may have, we have floor accessories to suit every application.
- Hard floor brush is ideal for polished timber floors. It is designed of maximum scratch protection.
- Combination floor brush features a lever for use on carpet or hard floor surfaces.
- Turbo brushes are recommended where extra cleaning power is needed. Designed for use on carpet, the rotating brushes aid in disturbing dust and dirt particles lodged in the carpet pile.
- Automatic dustpans are ideal where floors are swept. All you do is simply push towards the dustpan and it will do all the messy work for you.

Hose & Attachments:

- The quality of attachments and tools are much higher than on-board tools of most portable vacuum cleaners.
- We have 9m or 12m hose kits to suit every house. Flexible and lightweight hose makes stair cleaning safe and easy, since there is no need to carry the vacuum up and down the steps with you.
- The telescopic tube has been ergonomically designed with height adjustment, ensuring that people with various heights can use it.
- Hose cover is padded and zippered for maximum paint protection. It prevents the plastic hose having direct contact with the walls and furniture.

Auskey International is the manufacturer of PVC vacuum pipes and fittings as well as ducted vacuum inlet valves, sweeps, elbows, vacpans, and other PVC fittings. Full range of quality products and competitive prices.

EASY INSTALLATION

Both new construction and retrofitting are easily accomplished by quality installers, often in one or two days. Because they are skilled and trained, systems will be properly installed; EXCEL Power Vac installers approach each job with the consumer's convenience in mind, as opposed to the installer's convenience. That means you'll get to work with an installer who designs a schematic layout of inlet valves based on cost, optimal performance and how you plan to use your system, with an attention to detail you'll appreciate every time you vacuum (no valves installed behind doors or other inconvenient spots, for example).

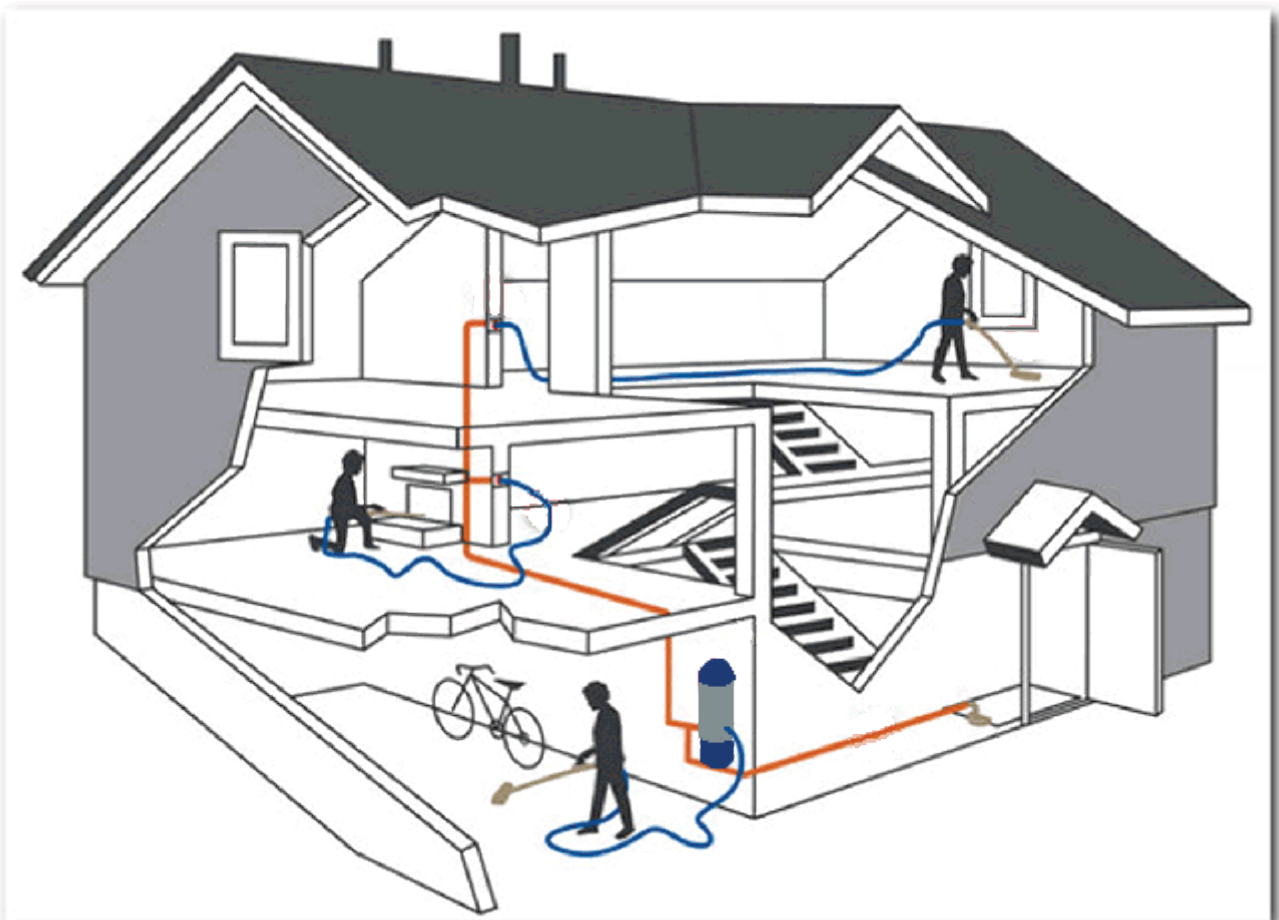

The Excel Power Unit can be located in the garage, carport, basement, utility room or any other area that is dry and remote enough that living areas will not be affected by the sound of the power unit's electric motor and fan.

CHOOSING THE RIGHT SYSTEM

Consider your lifestyle. Every house gets its share of dust, tracked-in dirt and lint that must be eliminated. Add in the activities of a busy family life, a pet or two, allergies or respiratory ailments, square footage of the home, lots of rugs and carpet, dusty locales and seasonal weather changes and cleaning needs escalate proportionately. You'll want to choose a ducted vac system with adequate power that not only lifts the dirt from surfaces but removes it completely from your living space so that it does not recirculate in the air. This is the common problem with portable vacuum cleaners. EXCEL Power Vac removes 100% of vacuumed dust, dirt and allergens from your home.

EXCEL Power Vac offers a variety of different Filtration Methods designed to deliver maximum power every time you vacuum. We can help you choose the power unit that best meets the needs of the square footage of your home. EXCEL Power Vac Units are engineered to match a home's square footage and your specific cleaning needs. EXCEL POWER VAC comes in 3 models; EXCEL 4000, EXCEL 5000 & EXCEL 6000. These units can be used with or without Filter Bags. Power units are available for homes of all sizes and layouts.

Auskey International has an Excel Power Vac Model to suit your preference. Excel Power Vac Systems use a "cyclonic" technology that separates larger dirt particles from the main air stream and drops these particles into a container, which can be removed for emptying. In bag systems the dirt is deposited into a double insulated disposable paper bag. Either system needs emptying only a few times per year.

Excel 4000

Excel 5000

Excel 6000

EXCEL 4000 POWER VAC:

COMES WITH FLOOR ACCESSORY KIT COMPRISING :

1 x 9m hose, 1 x telescopic rod, 1 x carpet brush, 1 x crevice tool, 1 x dusting brush, 1 x upholstery tool

SPECS:

240V, 1374w, 2.0hp - Noise @ 2m (DB) 58.7 - 560 Air Watts - Max 25SQ or 7 points - Bag & Bagless Dual System

EXCEL 5000 POWER VAC:

COMES WITH FLOOR ACCESSORY KIT COMPRISING :

1 x 9m hose, 1 x telescopic rod, 1 x carpet brush, 1 x crevice tool, 1 x dusting brush, 1 x upholstery tool
