

EXCEL POWER - VAC

Congratulations on choosing EXCEL POWER VAC for your central vacuum system.

Your vacuuming will be quieter, easier and healthier with all the dust and dirt being removed from the house to the main unit located in the cellar, garage or outside (canopy needed for outside use), this is a great benefit to people who suffer with allergies, hay fever, asthma or respiratory problems. Your new EXCEL POWER VAC is designed and manufactured in Australia by Auskay International Pty. Limited

OPERATING & CARE OF YOUR VACUUM

- Make sure the power unit is turned on at the power point, and that the on - off switch on the front of the unit is turned off.
- Simply plug in the cuff end of the hose in the inlet valve located inside the house and the vacuum unit will switch on automatically.
- After vacuuming you should let the vacuum unit run for several seconds before removing the hose from the inlet valve to ensure that all the dirt and dust has reached the main unit, this will reduce the chance of build up of dirt in the pipes.
- When vacuuming curtains and delicate objects you can use the pressure release valve located on the curved wand to reduce the suction.
- When you use the valve on the main unit you need to switch on the unit manually by the on - off switch located on the front of the unit.
- It is not recommended to use more than one inlet valve at the same time, as this will reduce the suction and could cause blockage.
- You should not at any time vacuum plaster powder, heavy objects or liquids.
- The bag or filter must be in place before the unit is turned on “failure to do so will cause motor failure and void warranty”. Foam filter unit, filter must be cleaned once a month with warm water only.
- If poor suction occurs you should replace the bag or clean the filter (filter models empty dust bin), it is recommended to do this once a month, more frequently for new home until carpet settles down to have problem free operation.

CONTENTS

Bagless unit

1 X Power Unit,
1 X Dustbin,
1 X Dust filter,
1 X Cyclonic plastic cone,
1 X Hanging bracket,
1 X 9m hose,
1 X Curved wand,
1 X Cuff,
1 X Retractable wand,
1 X Dual floor tool,
1 X Crevice tool,
Owner's Manual

Bag unit

1 X Power Unit,
1 X Dust bin container,
1 X Paper dust bag
1 X Hanging bracket,
1 X 9m hose,
1 X Curved wand,
